

THE SMART CHOICE

10 YEAR WARRANTY

The EnduroShield Project Warranty system provides both glass providers, contractors, and end customers with a simple and transparent approach to registering their EnduroShield 10 year warranty. The warranty process captures data such as the customer's name, address, date of installation, contractor, and customized warranty code. This data is maintained in a database, allowing for quick and accurate access to all necessary information in the event of a customer call.

LEED

The Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ is a third-party certification program which does not rate products, rather is used to rate green building projects.

As part of our commitment to green projects, EnduroShield is a proud member of the US Green Building Council (USGBC), the developer of the ratings systems, reinforcing the environmental benefits that a project can attain when EnduroShield® is specified.

Individual products like EnduroShield® can, however, contribute points to LEED® projects. EnduroShield can be considered as a potential contributor to credits through the improved water efficiency from a reduction cleaning time and frequency, at the same time the long lasting easy clean surface negates the need for harsh/impact chemicals to be used leading to a reduction site chemical usage / run off.

GREEN

In a fragile world, with the difficulties we all share, every little change we bring about does make a difference. As a revolutionary, permanent* non-stick coating, EnduroShield reduces the need for glass replacement. In addition the need for harsh cleaning or restoration chemicals is negated and because cleaning frequency and time is reduced, a water usage saving can be achieved.

HOW TO SPECIFY

To make it easy to specify EnduroShield® for your next project, a two page specification on each product is available to download at: www.enduroshield.com/specifications

It's Easy To Be Green
With EnduroShield

EnduroShield® eliminates the need for harsh chemical cleaners and diminishes the water used in frequent cleaning.
